Paul Szyndler
auDA Industry Advisory Panel

To the auDA Industry Panel,

UberGlobal would like to thank the Panel for the opportunity to respond to the current recommendations paper and puts forward the following views around these specific recommendations:

Issue 1. The method of 2LD registry operator selection/appointment post-2014

Based on the previous performance of the current Registry provider and the potential impacts of a change in registry operator, UberGlobal supports the Panel's recommendations that the current contract with AusRegistry should be extended by renegotiation and that auDA should retain a single registry for all existing .au 2LDs. We are therefore fully supporting the Panel recommendations 1A and 1B of a renegotiated contract for up to 4 years with AusRegistry.

Issue 3. Registrar security

UberGlobal fully supports recommendation 3 and the implementation of the auDA ISS for all current and future accredited Registrars and sees this as a positive step for the industry as a whole.

Issue 5. The policy and process for Registrar transfers

UberGlobal fully supports recommendations 5A, 5B and 5C. In particular 5B will allow existing organisations that operate multiple Registrars to better service Registrants by migrating their domains into the parent Registrar account.

Additionally UberGlobal has no issues with and supports the other recommendations that the Panel is proposing within the recommendations paper.

Regards,

Dwayne Varey
